Experience

1. Baroda Moulds & Dies Private limited, Waghodia, Vadodara

- **Senior Quality Engineer** **March 2024 - Present**
- Developed and implemented corrective actions for non-conforming products, collaborating closely with engineering and quality teams to minimize defects.
 - Led quality assurance processes for final and in-process product inspections, ensuring compliance with company standards and industry regulations.
 - Coordinated cross-functional communication among engineers, senior engineers, and QC in-charge to promptly address product failures and discrepancies.
 - Prepared and maintained detailed route cards and inspection reports to track product quality and process adherence throughout production stages.
 - Trained and mentored junior engineers and quality control personnel on advanced quality engineering methodologies and best practices.
 - Collaborated with cross-functional teams to design and execute quality audits, ensuring compliance with ISO 9001,45000,14000 standards and regulatory requirements.
 - Supervised and validated compliance with quality standards during product processing stages to ensure defect-free outputs and regulatory adherence.
 - Managed non-conformance reports and coordinated corrective actions in collaboration with engineering teams, significantly reducing defect rates and rework.

2. Capiq Engineering Private Limited, Gorwa, Vadodara

- **QA/QC Engineer** **Sep 2021 – March 2024**
- Review the final and-process product inspections.
 - Inspect products in accordance with quality standards and inspection criteria.
 - output samples and evaluate them using methods. Report quality issues or findings to the Engineer, Senior Engineer, and QC In-charge, ensuring that corrective actions are or will be implemented.
 - the absence of an authorized person, release products for the next stage only after confirming that all activities have been completed as per the plan.

- Process non-conforming products for rework in line with quality and take corrective actions. Adhere to and maintain company quality standards in compliance with the quality policy. Complete the route card and process the product for the subsequent stage.
- Coordinate with the Engineer, Senior Engineer, and In-charge regarding any failures or discrepancies the product.
