PROFESSIONAL SUMMARY

Motivated B.Tech Electrical Engineering student (Graduating 2026) with foundational knowledge in industrial automation, microcontroller-based systems, and AutoCAD-based electrical design. Hands-on experience in sensor-based safety systems and automatic power switching solutions. Proven leadership, coordination, and communication skills. Seeking entry-level opportunities in core electrical, automation, or power systems.

EDUCATION

B.Tech – Electrical Engineering

Invertis University | 2026

Diploma – Electrical Engineering

Invertis University | 2022

HSC (UP Board) | 2019

SSC (UP Board) | 2017

TECHNICAL SKILLS

AutoCAD (Electrical Schematics & Layouts) • Industrial Automation (Basics) • Sensors & Detection Systems
• MS Excel / MS Office

PROJECTS

Fire Detection and Alarm System

Designed and implemented a sensor-based fire detection system using smoke and temperature sensors. Integrated an automatic alarm triggering mechanism for early hazard detection and safety enhancement.

Power Supply with Auto Switching

Developed a microcontroller-based automatic transfer switching system capable of detecting power failure and seamlessly switching to a backup source, ensuring uninterrupted operation.

INTERNSHIP / TRAINING

Industrial Automation Virtual Internship

EduSkills Academy | Jul – Sep 2025

Gained exposure to industrial automation concepts, sensors, and control systems with industry-oriented learning.

LEADERSHIP & RESPONSIBILITIES

Placement Coordinator

Invertis University | Aug 2025 – Present

Coordinating campus placement activities, assisting recruitment drives, facilitating communication between students and Training & Placement Cell, and supporting scheduling & preparation activities.

ACHIEVEMENTS

Rajyapal Award – Scouts and Guides

Recognized for leadership, discipline, teamwork, and service commitment.

SOFT SKILLS

Leadership • Team Collaboration • Adaptability • Quick Learning • Communication Skills
