SUMMARY

I'm a computer science student and an aspiring Full-Stack Developer looking for my first internship. I've spent my time building my own projects and getting the fundamentals down. Now, I'm ready to move beyond the classroom. I'm looking to join a team where I can contribute to real codebases, learn from experienced engineers, and work hard to help the team succeed

SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3
- **Frontend Development:** React, Tailwind CSS
- **Backend Development:** Node.js, Express.js
- **Databases:** MongoDB
- **APIs & Integration:** RESTful APIs, JSON
- **Tools & Platforms:** Git, GitHub, VS Code, Postman
- **Additional Skills:** Responsive Web Design, Authentication, CRUD Operations, Debugging

PROJECTS

ZOIN— FoodReels Platform (MERN)

- Built a reels-style food video feed to solve content discovery and engagement for food-based platforms
- Implemented smooth scrolling and optimized rendering to handle continuous video loading without performance drops
- Developed an admin panel to solve content management and moderation challenges
- Designed REST APIs and MongoDB schemas to ensure reliable data flow between frontend and backend

KANSO — URL Shortener (MERN)

- Built a scalable URL shortener to solve long, unmanageable links and improve sharing efficiency
- Designed backend APIs to handle high-volume redirection requests efficiently
- Implemented clean architecture and error handling to reduce failures in production scenarios
- Structured the database and logic to support future scalability and feature expansion

EDUCATION

Bachelor of Science in Computer Science
Mumbai University

Aug 2024 – Jun 2027 (Expected)

CERTIFICATIONS

Full-Stack Web Development — Sheryians Coding School

Feb 2025 – Dec 2025
